This is a template of the abstract with authors from different institutions. You can indicate up to 6 different institutions by labels `\ada` ... `\adf`. Use `\ac` command to separate labels. For the template of the abstract with authors from the same institution see `templ1.tex`.

Abstract must fit in a 11 cm × 16 cm frame and typed using a 10 pt font (i.e. approximately 300 words). Please underline the presenting author's name.

The LaTeX style file and templates are available from the workshop WWW page `http://www.icmp.lviv.ua/statphys2019/`

The size of abstract is restricted to ***one* page**. Please note that the current LaTeX style applies *an automatic cut-off* of the abstract to *one* page.

Both source `*.tex` file, with figures if any, and generated `*.pdf` file must be submitted in electronic form to `statphys2019@icmp.lviv.ua`
