

### **Inelastic neutron scattering applied to the investigation of collective excitations in topologically disordered matter [Condens. Matter Phys., 2008, 11, 1(53), 7]**

J.-B.Suck

Received April 22, 2008

**Key words:** *inelastic neutron scattering, correlation functions, dispersion relations, collective excitations, topologically disordered matter*

**PACS:** *61.12.Ex, 63.20.Dj, 63.50.+x*

In the above mentioned publication the denominator of the prefactor of equation (31) was unfortunately wrongly given. The equation should read:

$$F(Q, \omega) \approx \left( \frac{2M}{k_B T} e^{2W(Q)} \right) \left( \frac{\omega}{Q} \right)^2 S^{\text{1phon}}(Q, \omega).$$
